

Hermes Passer - 2017

This program provide two ways to be used, by GUI that allows one download at a time and by command line, which allows create scripts to automatize the process allowing multiple downloads.

Download by GUI

First you need install *Shoes*. You can download the latest version (7/2017) clicking [here](#) or access the [list of versions](#) to be able to download for non-windows systems.

After that, you need download the *Mangafox Downloader*, de latest version is available on your [page](#).

When the download is finished, just open normally. If the system asks what program you want to open it with then just open the program with Shoes).

To start you download, first you need specify the location where it will be downloaded, then type the name of manga and click in the *Search manga* button. If the manga exist the cover will appear and you may type the volume and chapter what you want download. (see About section in the program for more information of how type manga, volume and chapter names).

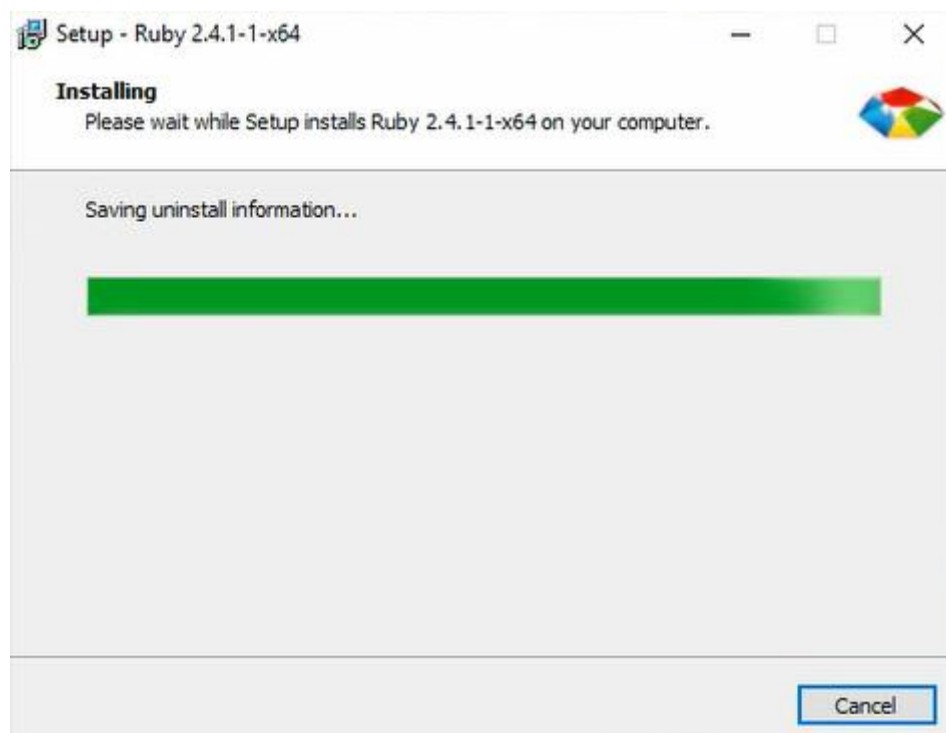

If the chapter is not within any volume then leave the vol field blank.

The *Download* button start the download and the *Cancel* button stop the download.

Download by command line

First you need install *Ruby*. For windows users click [here](#) or [here](#) for other systems.

After, you need download and unzip the source code of *Mangafox Downloader* available [here](#).

To download by command line you need call the main program script (*main.rb*) with *Ruby*.

Parameters:

Download: m:[manga_name], v:[vol_name] (optional), c:[chapter_name], p:[destination_path]

Help: h: / *Update:* u:

Example: ruby main.rb m:tamen_de_gushi c:c001 p:C:/users/hermes/manga

You can also create batch files to automatize the process and download multiple chapters. To do this, you need to create a file and save it with the *.bat* extension. The code in text at the end of this file.

```
@rem Put inside of the quotation marks the location of mangafox downloader
@cd "C:\Users\Diogo\Dropbox\zProjects\Dev\Public\MangaFox Downloader"

@rem Make the folder for the chapter
@mkdir C:\Users\Diogo\Desktop\vanadis\c037
@rem Download the chapter in the folder defined above
@ruby main.rb m:madan_no_ou_to_vanadis v:v07 c:c037 p:C:\Users\Diogo\Desktop\vanadis\c037
@rem Compact the folder
@powershell -command "& {&Compress-Archive C:\Users\Diogo\Desktop\vanadis\c037 C:\Users\Diogo\Desktop\vanadis\c037.zip}"
@rem Delete the folder
@rmdir C:\Users\Diogo\Desktop\vanadis\c037 /s /q

@rem Loop that will be repeated 'n' times all inside of the parentheses,
@rem FOR /L %%A IN (initial chapter,1 , last chapter) DO
@rem %%A will be replaced by the current value of the loop
@FOR /L %%A IN (38,1,41) DO (
    @mkdir C:\Users\Diogo\Desktop\vanadis\c%%A
    ruby main.rb m:madan_no_ou_to_vanadis v:v08 c:c0%%A p:C:\Users\Diogo\Desktop\vanadis\c%%A
    @powershell -command "& {&Compress-Archive C:\Users\Diogo\Desktop\vanadis\c%%A C:\Users\Diogo\Desktop\vanadis\c%%A.zip}"
    @rmdir C:\Users\Diogo\Desktop\vanadis\c%%A /s /q
)

pause
```

Above you can see program working and the final result.
